NIANRO Consulting is carrying out research to understand the career experiences of Black, Asian & minority ethnic prison educators.

We are interested in why you became a prison educator, your experiences while in the role and if you have considered leaving or have left the profession.

Our aim is to identify ways to help improve your workplace experiences.

We'd like to speak with those who:

- define as Black, Asian or any other minority ethnic group
- are currently working in prison education AND...
- ...those who have left prison education in the last five years

Interviews will be **confidential** & last about 75mins.
